

Please do not do anything that could jeopardize K-LOVE radio which is currently broadcast nationally via an FM Translator. I understand that switching to an LPFM could end up forcing K-LOVE off the air. This station plays uplifting music all day long, carries encouraging stories and offers hope that very few places offer today. It's more than a radio station - it's a place where people can call to share concerns and get help. It's a station that an entire family can listen to together and all enjoy it - there's nothing that has to be censored for young ears, or that sets a bad example. I, along with what I would guess are thousands of others, personally support this radio station with monthly contributions - it's worthy of my support. Again, please do not pass any rules or legislation that would jeopardize the ability of K-LOVE to remain in operation. I know of no other station that offers the enjoyment and encouragement that this station does.
